Sheikh Abdul Rehman

+92 344 2710755 | Karachi, Pakistan | sheikhabdulrehman36@gmail.com | LinkedIn | Google Scholar

Summary

AI Engineer and independent AI/ML researcher with a completed Bachelor of Science in Artificial Intelligence and recognition as a Kaggle 2× Grandmaster. Hands-on experience in Generative AI, RAG, quantized LLMs, speech-to-reasoning, ML/DL, NLP, computer vision, predictive analytics, and enterprise automation. Core tools include Python, SQL, Scikit-learn, TensorFlow/Keras, Hugging Face, OpenAI APIs, Whisper, Pandas, NumPy, Streamlit, Git, and OpenCV.

Education

Sindh Madressatul Islam University (SMIU) — Karachi, Pakistan
Bachelor of Science in Artificial Intelligence — Sep 2022 — Aug 2026

- Grade: 3.5/4.0
- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Automata Theory, Data Structures

Experience

Data Scientist Intern — Nov 2026 — Present
10Pearls — Remote

- Conducted data analysis, preprocessing, and exploratory data analysis to support data-driven projects.
- Developed and evaluated machine learning models and communicated insights through visualizations.

Generative AI Engineer Intern — Feb 2026 — May 2026
Arch Technologies — Remote

- Built a Retrieval-Augmented Generation pipeline using Unsloth dynamic 4-bit quantized LLMs for efficient document retrieval and context-aware response generation.
- Optimized GPU memory usage for more efficient Generative AI workflows involving quantized language models.
- Developed an end-to-end Speech-to-Reasoning pipeline integrating OpenAI Whisper with quantized Llama and Qwen reasoning models.

AI/ML Engineering Intern — Nov 2025 — Jan 2026
DevelopersHub Corporation — Remote

- Delivered projects in regression, classification, time-series prediction using real stock-market data, and medical data analysis.
- Built LLM-based chatbots through prompt engineering, fine-tuning, and deployment using Hugging Face and OpenAI-based models.
- Implemented end-to-end workflows covering preprocessing, EDA, visualization, training, evaluation, and interpretation.

Data Analytics Intern — Sep 2025 — Oct 2025
CodeAlpha · Internship — Remote

- Collected and structured data from multiple websites using Python libraries, including BeautifulSoup and Scrapy, as well as automation tools such as Octoparse and ParseHub.
- Conducted exploratory data analysis using Pandas, NumPy, and Matplotlib, generating automated analytical reports in PDF.
- Processed and analyzed text from Amazon reviews, social media, and news articles using NLP sentiment analysis.

Data Analyst — Oct 2025 — Nov 2025
YoungDev Intern · Internship — Remote

- Cleaned and interpreted real datasets, created meaningful visualizations, and applied predictive modeling techniques.
- Strengthened analytical thinking, documentation, and structured problem-solving through practical data-driven tasks.

Data Analytics & Visualization Intern — Jul 2025 — Sep 2025
International Packaging Films Limited — Lahore, Pakistan

- Built PETPAK IntelliLine and Powerhouse dashboards for production, energy, expense, downtime, and OEE-related KPIs.
- Developed FlowIndices, a Streamlit SOP-to-workflow application; DocWeaver, an Excel/CSV merge-split automation tool; and SARKS, an SAP role-validation system.
- Worked with SAP SD, FI, CO, HCM, MM, and PP modules to support enterprise analysis and access validation.

Independent AI/ML Researcher | Kaggle 2× Grandmaster — Jul 2025 — Jul 2026
Kaggle — Remote

- Progressed from Kaggle Contributor to Expert, Master, and 2× Grandmaster through applied AI research, analytical notebooks, and dataset development.
- Developed reproducible notebooks and reusable datasets using computer vision, NLP, sequence modeling, LSTM, GRU, and Transformer architectures.

Final Year Project

Final Year Project, DyslexiaEase: A Cognitive AI Framework for Early Dyslexia Screening and Adaptive Learning

- Developed a dyslexia-friendly, AI-assisted framework integrating early screening of reading, spelling, phonological awareness, memory, and sequencing skills with adaptive practice, cognitive and literacy-focused games, progress tracking, reporting, and AI-assisted guidance.
- Designed a continuous screen → practice → monitor → improve learning experience.
- Recognized by FYP evaluators and shortlisted for display at TechFest 3.0; appreciated for its practical relevance and learner-centered approach.
- Goal: Make Learning Feel Possible Again.

Selected Projects

- **Generative AI for Fashion Design:** Trained GAN and SRGAN models on 2,998 T-shirt images to generate realistic, high-resolution apparel designs.
- **Bat-Inspired Navigation System:** Developed a DFA-based echolocation model for noise-resilient and adaptive navigation in autonomous and robotic systems.
- **AI/ML Portfolio:** Ongoing work across computer vision, tabular data, predictive modeling, NLP, forecasting, visualization, and Generative AI.

Publications and Research

Co-author — JScholar–JAIST, 2025, Optimizing Bat-Inspired Navigation Systems with Automata-Based Theory

- Research on DFA-based echolocation for noise-resilient and energy-efficient navigation in autonomous and robotic systems.

Manuscript under review, Karachi Crime Data Analysis

- Research study focused on data-driven analysis of crime patterns and trends in Karachi.

Manuscript under review, Solar Energy Analysis and Forecasting

- Research study focused on analytical and predictive methods for solar-energy data and performance patterns.

Manuscript under review, Knowledge-Based Dog Posture Detection

- Research study on explainable, rule-based detection of posture abnormalities using knowledge engineering and intelligent-system methods.

Awards and Recognition

- Kaggle 2× Grandmaster, 2026; Kaggle Meetup Organizer Award, 2025 (first recipient from Pakistan and among the top 12 globally).
- Keynote Speaker and Community Trainer, 2025 — delivered an applied AI/ML session at Zaitoon Ashraf IT Park through Saylani Mass IT Training.

Certifications

AI Ethics (DataCamp, 2026); Microsoft Azure AI Essentials Certificate (Microsoft, 2026); n8n No-Code AI Agent Builder (Simplilearn, 2026); LLM Concepts (DataCamp, 2025); Transformer Models and BERT (Google Cloud Skills Boost, 2025); Career Essentials in Generative AI (Microsoft and LinkedIn, 2025); Google AI Essentials (Coursera, 2024).
